#### Disclaimer:

Specifications and information contained in this documentation are furnished for informational use only and subject to change without notice, and should not be constructed as a commitment by ASRock. ASRock assumes no responsibility for any errors or omissions that may appear in this documentation.

With respect to the contents of this documentation, ASRock does not provide warranty of any kind, either expressed or implied, including but not limited to the implied warranties or conditions of merchantability or fitness for a particular purpose.

In no event shall ASRock, its directors, officers, employees, or agents be liable for any indirect, special, incidental, or consequential damages (including damages for loss of profits, loss of business, loss of data, interruption of business and the like), even if ASRock has been advised of the possibility of such damages arising from any defect or error in the documentation or product.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

#### CALIFORNIA, USA ONLY

The Lithium battery adopted on this motherboard contains Perchlorate, a toxic substance controlled in Perchlorate Best Management Practices (BMP) regulations passed by the California Legislature. When you discard the Lithium battery in California, USA, please follow the related regulations in advance.

"Perchlorate Material-special handling may apply, see <a href="www.dtsc.ca.gov/hazardouswaste/perchlorate">www.dtsc.ca.gov/hazardouswaste/perchlorate</a>"

# **Chapter 1 Introduction**

Thank you for purchasing ASRock B365M Pro4 motherboard, a reliable motherboard produced under ASRock's consistently stringent quality control. It delivers excellent performance with robust design conforming to ASRock's commitment to quality and endurance.

In this documentation, Chapter 1 and 2 contains the introduction of the motherboard and step-by-step installation guides. Chapter 3 contains the operation guide of the software and utilities. Chapter 4 contains the configuration guide of the BIOS setup.

Because the motherboard specifications and the BIOS software might be updated, the content of this documentation will be subject to change without notice. In case any modifications of this documentation occur, the updated version will be available on ASRock's website without further notice. If you require technical support related to this motherboard, please visit our website for specific information about the model you are using. You may find the latest VGA cards and CPU support list on ASRock's website as well. ASRock website <a href="http://www.asrock.com">http://www.asrock.com</a>.

### 1.1 Package Contents

- ASRock B365M Pro4 Motherboard (Micro ATX Form Factor)
- · ASRock B365M Pro4 Quick Installation Guide
- ASRock B365M Pro4 Support CD
- 2 x Serial ATA (SATA) Data Cables (Optional)
- 3 x Screws for M.2 Sockets (Optional)
- 1 x Standoff for M.2 Socket (Optional)
- 1 x I/O Panel Shield

#### 1.2 Specifications

#### **Platform**

- Micro ATX Form Factor
- · Solid Capacitor design

#### **CPU**

- Supports 9<sup>th</sup> and 8<sup>th</sup> Gen Intel® Core<sup>TM</sup> Processors (Socket 1151)
- Supports CPU up to 95W
- Digi Power design
- 8 Power Phase design
- Supports Intel® Turbo Boost 2.0 Technology

#### Chipset

• Intel® B365

#### Memory

- Dual Channel DDR4 Memory Technology
- 4 x DDR4 DIMM Slots
- Supports DDR4 2666/2400/2133 non-ECC, un-buffered memory
- Supports ECC UDIMM memory modules (operate in non-ECC mode)
- Max. capacity of system memory: 64GB
- Supports Intel® Extreme Memory Profile (XMP) 2.0
- 15µ Gold Contact in DIMM Slots

# Expansion Slot

- 2 x PCI Express 3.0 x16 Slots (PCIE1/PCIE3: single at x16 (PCIE1); dual at x16 (PCIE1) / x4 (PCIE3))
- \* Supports NVMe SSD as boot disks
- 1 x PCI Express 3.0 x1 Slot (Flexible PCIe)
- Supports AMD Quad CrossFireX<sup>TM</sup> and CrossFireX<sup>TM</sup>
- 1 x M.2 Socket (Key E), supports type 2230 WiFi/BT module

#### Graphics

- Intel\* UHD Graphics Built-in Visuals and the VGA outputs can be supported only with processors which are GPU integrated.
- Supports Intel® UHD Graphics Built-in Visuals: Intel®
   Quick Sync Video with AVC, MVC (S3D) and MPEG-2 Full
   HW Encode1, Intel® InTru<sup>TM</sup> 3D, Intel® Clear Video HD
   Technology, Intel® Insider<sup>TM</sup>, Intel® UHD Graphics
- DirectX 12

- HWAEncode/Decode: AVC/H.264, HEVC/H.265 8-bit, HEVC/H.265 10-bit, VP8, VP9 8-bit, VP9 10-bit (Decode only), MPEG2, MJPEG, VC-1 (Decode only)
- Three graphics output options: D-Sub, DVI-D and HDMI
- Supports Triple Monitor
- Supports HDMI 1.4 with max. resolution up to 4K x 2K (4096x2160) @ 30Hz
- Supports DVI-D with max. resolution up to 1920x1200 @ 60Hz
- Supports D-Sub with max. resolution up to 1920x1200 @ 60Hz
- Supports Auto Lip Sync, Deep Color (12bpc), xvYCC and HBR (High Bit Rate Audio) with HDMI 1.4 Port (Compliant HDMI monitor is required)
- Supports HDCP 2.2 with DVI-D and HDMI 1.4 Ports
- Supports 4K Ultra HD (UHD) playback with HDMI 1.4 Port

#### Audio

- 7.1 CH HD Audio with Content Protection (Realtek ALC892 Audio Codec)
- \* To configure 7.1 CH HD Audio, it is required to use an HD front panel audio module and enable the multi-channel audio feature through the audio driver.
- Premium Blu-ray Audio support
- Supports Surge Protection
- · ELNA Audio Caps

#### LAN

- Gigabit LAN 10/100/1000 Mb/s
- Giga PHY Intel® I219V
- Supports Wake-On-LAN
- Supports Lightning/ESD Protection
- Supports Energy Efficient Ethernet 802.3az
- Supports PXE

#### **Rear Panel**

I/O

- 1 x PS/2 Mouse/Keyboard Port
- 1 x D-Sub Port
- 1 x DVI-D Port
- 1 x HDMI Port
- 2 x USB 2.0 Ports
- 1 x USB 3.1 Gen1 Type-C Port (Supports ESD Protection)
- 4 x USB 3.1 Gen1 Ports (Supports ESD Protection)

- 1 x RJ-45 LAN Port with LED (ACT/LINK LED and SPEED LED)
- HD Audio Jacks: Line in / Front Speaker / Microphone

#### Storage

- 6 x SATA3 6.0 Gb/s Connectors, support RAID (RAID 0, RAID 1, RAID 5, RAID 10, Intel Rapid Storage Technology 17), NCQ, AHCI and Hot Plug\*
- \* If M2\_2 is occupied by a SATA-type M.2 device, SATA3\_0 will be disabled.
- 1 x Ultra M.2 Socket (M2\_1), supports M Key type
   2242/2260/2280 M.2 PCI Express module up to Gen3 x4 (32 Gb/s)\*\*
- 1 x Ultra M.2 Socket (M2\_2), supports M Key type
   2242/2260/2280/22110 M.2 SATA3 6.0 Gb/s module and M.2
   PCI Express module up to Gen3 x4 (32 Gb/s)\*\*
- \*\* Supports Intel® Optane<sup>TM</sup> Technology
- \*\* Supports NVMe SSD as boot disks
- \*\* Supports ASRock U.2 Kit

#### Connector

- 1 x COM Port Header
- 1 x TPM Header
- 1 x Chassis Intrusion and Speaker Header
- 2 x RGB LED Headers
- \* Support in total up to 12V/3A, 36W LED Strip
- 1 x Addressable LED Header
- \* Supports in total up to 5V/3A, 15W LED Strip
- 1 x CPU Fan Connector (4-pin)
- $^{\ast}$  The CPU Fan Connector supports the CPU fan of maximum 1A (12W) fan power.
- 1 x CPU/Water Pump Fan Connector (4-pin) (Smart Fan Speed Control)
- \* The CPU/Water Pump Fan supports the water cooler fan of maximum 2A (24W) fan power.
- 3 x Chassis/Water Pump Fan Connectors (4-pin) (Smart Fan Speed Control)
- \* The Chassis/Water Pump Fan supports the water cooler fan of maximum 2A (24W) fan power.
- \* CPU\_FAN2/WP, CHA\_FAN1/WP, CHA\_FAN2/WP and CHA\_FAN3/WP can auto detect if 3-pin or 4-pin fan is in use.
- 1 x 24 pin ATX Power Connector

- 1 x 8 pin 12V Power Connector
- 1 x Front Panel Audio Connector
- 2 x USB 2.0 Headers (Support 4 USB 2.0 ports) (Supports ESD Protection)
- 1 x USB 3.1 Gen1 Header (Supports 2 USB 3.1 Gen1 ports) (Supports ESD Protection)

#### BIOS Feature

- AMI UEFI Legal BIOS with multilingual GUI support
- ACPI 6.0 Compliant wake up events
- SMBIOS 2.7 Support
- CPU, DRAM, PCH 1.0V, VCCSA, VCCST Voltage Multiadjustment

#### Hardware Monitor

- Temperature Sensing: CPU, CPU/Water Pump, Chassis/Water Pump Fans
- Fan Tachometer: CPU, CPU/Water Pump, Chassis/Water Pump Fans
- Quiet Fan (Auto adjust chassis fan speed by CPU temperature): CPU, CPU/Water Pump, Chassis/Water Pump Fans
- Fan Multi-Speed Control: CPU, CPU/Water Pump, Chassis/ Water Pump Fans
- CASE OPEN detection
- Voltage monitoring: +12V, +5V, +3.3V, CPU Vcore, DRAM, PCH 1.0V, VCCSA, VCCST

os

Microsoft® Windows® 10 64-bit

#### Certifica-

• FCC, CE

tions

• ErP/EuP Ready (ErP/EuP ready power supply is required)

<sup>\*</sup> For detailed product information, please visit our website: http://www.asrock.com

Please realize that there is a certain risk involved with overclocking, including adjusting the setting in the BIOS, applying Untied Overclocking Technology, or using third-party overclocking tools. Overclocking may affect your system's stability, or even cause damage to the components and devices of your system. It should be done at your own risk and expense. We are not responsible for possible damage caused by overclocking.

## 1.3 Motherboard Layout

No.	Description
1	ATX 12V Power Connector (ATX12V1)
2	CPU Fan Connector (CPU_FAN1)
3	2 x 288-pin DDR4 DIMM Slots (DDR4_A1, DDR4_B1)
4	2 x 288-pin DDR4 DIMM Slots (DDR4_A2, DDR4_B2)
5	CPU/Water Pump Fan Connector (CPU_FAN2/WP)
6	Addressable LED Header (A_RGB_LED1)
7	ATX Power Connector (ATXPWR1)
8	USB 3.1 Gen1 Header (USB3_5_6)
9	RGB LED Header (RGB_LED2)
10	SATA3 Connector (SATA3_2)
11	SATA3 Connector (SATA3_3)
12	SATA3 Connector (SATA3_5)
13	SATA3 Connector (SATA3_4)
14	Chassis Intrusion and Speaker Header (SPK_CI1)
15	System Panel Header (PANEL1)
16	SATA3 Connector (SATA3_0)
17	SATA3 Connector (SATA3_1)
18	USB 2.0 Header (USB5_6)
19	USB 2.0 Header (USB3_4)
20	Chassis/Water Pump Fan Connector (CHA_FAN2/WP)
21	Chassis/Water Pump Fan Connector (CHA_FAN3/WP)
22	TPM Header (TPMS1)
23	RGB LED Header (RGB_LED1)
24	Clear CMOS Jumper (CLRMOS1)
25	COM Port Header (COM1)
26	Front Panel Audio Header (HD_AUDIO1)
27	Chassis/Water Pump Fan Connector (CHA_FAN1/WP)

#### 1.4 I/O Panel

No.	Description	No.	Description
1	USB 2.0 Ports (USB12)*	7	USB 3.1 Gen1 Ports (USB3_3_4)
2	D-Sub Port	8	USB 3.1 Gen1 Ports (USB3_1_2)
3	LAN RJ-45 Port**	9	USB 3.1 Gen1 Type-C Port (USB3_TC_1)
4	Line In (Light Blue)***	10	DVI-D Port
5	Front Speaker (Lime)***	11	HDMI Port
6	Microphone (Pink)***	12	PS/2 Mouse/Keyboard Port

<sup>\*</sup> Please note that the USB1 consumes auxiliary power (+5VSB) while the other USB ports consume DUAL Power (+5VDUAL). The USB1 is optimal for connecting the USB Type speaker and headset.

<sup>\*\*</sup> There are two LEDs on the LAN port. Please refer to the table below for the LAN port LED indications.

Activity / Link LED		Speed LED	
Status	Description	Status	Description
Off	No Link	Off	10Mbps connection
Blinking	Data Activity	Orange	100Mbps connection
On	Link	Green	1Gbps connection

\*\*\* To configure 7.1 CH HD Audio, it is required to use an HD front panel audio module and enable the multichannel audio feature through the audio driver.

Please set Speaker Configuration to "7.1 Speaker" in the Realtek HD Audio Manager.

Function of the Audio Ports in 7.1-channel Configuration:

Port	Function
Light Blue (Rear panel)	Rear Speaker Out
Lime (Rear panel)	Front Speaker Out
Pink (Rear panel)	Central /Subwoofer Speaker Out
Lime (Front panel)	Side Speaker Out

# **Chapter 2 Installation**

This is a Micro ATX form factor motherboard. Before you install the motherboard, study the configuration of your chassis to ensure that the motherboard fits into it.

#### **Pre-installation Precautions**

Take note of the following precautions before you install motherboard components or change any motherboard settings.

- Make sure to unplug the power cord before installing or removing the motherboard components. Failure to do so may cause physical injuries and damages to motherboard components.
- In order to avoid damage from static electricity to the motherboard's components, NEVER place your motherboard directly on a carpet. Also remember to use a grounded wrist strap or touch a safety grounded object before you handle the components.
- Hold components by the edges and do not touch the ICs.
- Whenever you uninstall any components, place them on a grounded anti-static pad or
  in the bag that comes with the components.
- When placing screws to secure the motherboard to the chassis, please do not overtighten the screws! Doing so may damage the motherboard.

# 2.1 Installing the CPU

- Before you insert the 1151-Pin CPU into the socket, please check if the PnP cap
  is on the socket, if the CPU surface is unclean, or if there are any bent pins in the
  socket. Do not force to insert the CPU into the socket if above situation is found.
  Otherwise, the CPU will be seriously damaged.
- $2. \ \ Unplug \ all \ power \ cables \ before \ installing \ the \ CPU.$

Please save and replace the cover if the processor is removed. The cover must be placed if you wish to return the motherboard for after service.

# 2.2 Installing the CPU Fan and Heatsink

# English

### 2.3 Installing Memory Modules (DIMM)

This motherboard provides four 288-pin DDR4 (Double Data Rate 4) DIMM slots, and supports Dual Channel Memory Technology.

- For dual channel configuration, you always need to install identical (the same brand, speed, size and chip-type) DDR4 DIMM pairs.
- 2. It is unable to activate Dual Channel Memory Technology with only one or three memory module installed.
- 3. It is not allowed to install a DDR, DDR2 or DDR3 memory module into a DDR4 slot; otherwise, this motherboard and DIMM may be damaged.

#### **Dual Channel Memory Configuration**

Priority	DDR4_A1	DDR4_A2	DDR4_B1	DDR4_B2
1		Populated		Populated
2	Populated	Populated	Populated	Populated

The DIMM only fits in one correct orientation. It will cause permanent damage to the motherboard and the DIMM if you force the DIMM into the slot at incorrect orientation.

# English

### 2.4 Expansion Slots (PCI Express Slots)

There are 3 PCI Express slots on the motherboard.

Before installing an expansion card, please make sure that the power supply is switched off or the power cord is unplugged. Please read the documentation of the expansion card and make necessary hardware settings for the card before you start the installation.

#### PCIe slots:

PCIE1 (PCIe 3.0 x16 slot) is used for PCI Express x16 lane width graphics cards. PCIE2 (PCIe 3.0 x1 slot) is used for PCI Express x1 lane width cards. PCIE3 (PCIe 3.0 x16 slot) is used for PCI Express x4 lane width graphics cards.

#### **PCIe Slot Configurations**

	PCIE1	PCIE3
Single Graphics Card	x16	N/A
Two Graphics Cards in CrossFireX <sup>™</sup> Mode	x16	x4

For a better thermal environment, please connect a chassis fan to the motherboard's chassis fan connector (CHA\_FAN1/WP, CHA\_FAN2/WP or CHA\_FAN3/WP) when using multiple graphics cards.

#### 2.5 Jumpers Setup

The illustration shows how jumpers are setup. When the jumper cap is placed on the pins, the jumper is "Short". If no jumper cap is placed on the pins, the jumper is "Open".

Clear CMOS Jumper (CLRMOS1) (see p.6, No. 24)

CLRMOS1 allows you to clear the data in CMOS. To clear and reset the system parameters to default setup, please turn off the computer and unplug the power cord from the power supply. After waiting for 15 seconds, use a jumper cap to short the pins on CLRMOS1 for 5 seconds. However, please do not clear the CMOS right after you update the BIOS. If you need to clear the CMOS when you just finish updating the BIOS, you must boot up the system first, and then shut it down before you do the clear-CMOS action. Please be noted that the password, date, time, and user default profile will be cleared only if the CMOS battery is removed. Please remember toremove the jumper cap after clearing the CMOS.

If you clear the CMOS, the case open may be detected. Please adjust the BIOS option "Clear Status" to clear the record of previous chassis intrusion status.

#### 2.6 Onboard Headers and Connectors

Onboard headers and connectors are NOT jumpers. Do NOT place jumper caps over these headers and connectors. Placing jumper caps over the headers and connectors will cause permanent damage to the motherboard.

System Panel Header (9-pin PANEL1) (see p.6, No. 15)

Connect the power switch, reset switch and system status indicator on the chassis to this header according to the pin assignments below. Note the positive and negative pins before connecting the cables.

#### PWRBTN (Power Switch):

Connect to the power switch on the chassis front panel. You may configure the way to turn off your system using the power switch.

#### RESET (Reset Switch):

Connect to the reset switch on the chassis front panel. Press the reset switch to restart the computer if the computer freezes and fails to perform a normal restart.

#### PLED (System Power LED):

Connect to the power status indicator on the chassis front panel. The LED is on when the system is operating. The LED keeps blinking when the system is in SI/S3 sleep state. The LED is off when the system is in S4 sleep state or powered off (S5).

#### HDLED (Hard Drive Activity LED):

Connect to the hard drive activity LED on the chassis front panel. The LED is on when the hard drive is reading or writing data.

The front panel design may differ by chassis. A front panel module mainly consists of power switch, reset switch, power LED, hard drive activity LED, speaker and etc. When connecting your chassis front panel module to this header, make sure the wire assignments and the pin assignments are matched correctly.

Chassis Intrusion and Speaker Header (7-pin SPK\_CI1) (see p.6, No. 14)

Please connect the chassis intrusion and the chassis speaker to this header.

Serial ATA3 Connectors

(SATA3\_0:

see p.6, No. 16)

(SATA3 1:

see p.6, No. 17)

(SATA3\_2:

see p.6, No. 10)

(SATA3\_3:

see p.6, No. 11)

(SATA3 4:

see p.6, No. 13)

(SATA3\_5:

see p.6, No. 12)

These six SATA3 connectors support SATA data cables for internal storage devices with up to 6.0 Gb/s data transfer rate. If M2\_2 is occupied by a SATA-type M.2 device, SATA3\_0 will be disabled.

USB 2.0 Headers (9-pin USB3\_4) (see p.6, No. 19) (9-pin USB5\_6)

(see p.6, No. 18)

There is one header on this motherboard. This USB 2.0 header can support two ports.

USB 3.1 Gen1 Header (19-pin USB3\_5\_6) (see p.6, No. 8)

There is one header on this motherboard. This USB 3.1 Gen1 header can support two ports.

Front Panel Audio Header (9-pin HD\_AUDIO1) (see p.6, No. 26)

This header is for connecting audio devices to the front audio panel.

- High Definition Audio supports Jack Sensing, but the panel wire on the chassis
  must support HDA to function correctly. Please follow the instructions in our
  manual and chassis manual to install your system.
- 2. If you use an AC'97 audio panel, please install it to the front panel audio header by the steps below:
  - A. Connect Mic IN (MIC) to MIC2 L.
  - B. Connect Audio\_R (RIN) to OUT2\_R and Audio\_L (LIN) to OUT2\_L.
  - C. Connect Ground (GND) to Ground (GND).
  - D. MIC\_RET and OUT\_RET are for the HD audio panel only. You don't need to connect them for the AC'97 audio panel.
  - $E.\ To\ activate\ the\ front\ mic,\ go\ to\ the\ "FrontMic"\ Tab\ in\ the\ Realtek\ Control\ panel\ and\ adjust\ "Recording\ Volume".$

Chassis/Water Pump Fan Connectors (4-pin CHA\_FAN1/WP) (see p.6, No. 27)

4 3 2 1

FAN VOLTAGE

FAN SPEED

(4-pin CHA\_FAN2/WP) (see p.6, No. 20) (4-pin CHA\_FAN3/WP) (see p.6, No. 21)

This motherboard provides three 4-Pin water cooling chassis fan connectors. If you plan to connect a 3-Pin chassis water cooler fan, please connect it to Pin 1-3.

CPU Fan Connector (4-pin CPU\_FAN1) (see p.6, No. 2)

This motherboard provides a 4-Pin CPU fan (Quiet Fan) connector. If you plan to connect a 3-Pin CPU fan, please connect it to Pin 1-3.

CPU/Water Pump Fan
Connector
(4-pin CPU\_FAN2/WP)
(see p.6, No. 5)

This motherboard provides a 4-Pin water cooling CPU fan connector. If you plan to connect a 3-Pin CPU water cooler fan, please connect it to Pin 1-3.

ATX Power Connector (24-pin ATXPWR1) (see p.6, No. 7)	12 24	This motherboard provides a 24-pin ATX power connector. To use a 20-pin ATX power supply, please plug it along Pin 1 and Pin 13.
ATX 12V Power Connector (8-pin ATX12V1) (see p.6, No. 1)	8 5 4 1	This motherboard provides a 8-pin ATX 12V power connector. To use a 4-pin ATX power supply, please plug it along Pin 1 and Pin 5.
Serial Port Header (9-pin COM1) (see p.6, No. 25)	RRXD1 DDTR#1 DDSR#1 CCTS#1 OOOO RRI#1 RRTS#1 TXD1 DDCD#1	This COM1 header supports a serial port module.
TPM Header (17-pin TPMS1) (see p.6, No. 22)	GND O GND  SERIRQ # O O +395 B  S_PWRDWN # O O LADO  GND O LADO  LADI O O LADO  SMB_DATA_MAIN O O PCICLK  GND O PCICLK  GND O PCICLK	This connector supports Trusted Platform Module (TPM) system, which can securely store keys, digital certificates, passwords, and data. A TPM system also helps enhance network security, protects digital identities, and ensures platform integrity.

RGB LED Headers (4-pin RGB_LED1) (see p.6, No. 23)	1 0000 12V G R B	RGB header is used to connect RGB LED extension cable which allows users to choose from vari- ous LED lighting effects.
(4-pin RGB_LED2) (see p.6, No. 9)	O B R O G 12V	Caution: Never install the RGB LED cable in the wrong orienta- tion; otherwise, the cable may be damaged. *Please refer to page 46 for further instructions on this header.
Addressable LED Header (3-pin A_DDR_LED1) (see p.6, No. 6)	O-GND O-DO_ADDR O-VOUT	This header is used to connect Addressable LED extension cable which allows users to choose from various LED lighting effects.

Caution: Never install the Addressable LED cable in the wrong orientation; otherwise, the cable may be damaged. \*Please refer to page 47 for further instructions on this

header.

# 2.7 CrossFireX<sup>™</sup> and Quad CrossFireX<sup>™</sup> Operation Guide

This motherboard supports  $CrossFireX^{TM}$  and  $Quad\ CrossFireX^{TM}$  that allows you to install up to three identical PCI Express x16 graphics cards.

- 1. You should only use identical CrossFire  $X^{TM}$ -ready graphics cards that are AMD certified.
- Make sure that your graphics card driver supports AMD CrossFireX<sup>™</sup> technology. Download the drivers from the AMD's website: www.amd.com
- Make sure that your power supply unit (PSU) can provide at least the minimum
  power your system requires. It is recommended to use a AMD certified PSU. Please
  refer to the AMD's website for details.
- If you pair a 12-pipe CrossFireX<sup>™</sup> Edition card with a 16-pipe card, both cards will operate as 12-pipe cards while in CrossFireX<sup>™</sup> mode.
- Different CrossFireX<sup>™</sup> cards may require different methods to enable CrossFireX<sup>™</sup>. Please refer to AMD graphics card manuals for detailed installation guide.

# 2.7.1 Installing Two CrossFireX<sup>™</sup>-Ready Graphics Cards

#### Step 1

Insert one graphics card into PCIE1 slot and the other graphics card to PCIE3 slot. Make sure that the cards are properly seated on the slots.

#### CrossFire Bridge

#### Step 2

Connect two graphics cards by installing a CrossFire Bridge on the CrossFire Bridge Interconnects on the top of the graphics cards. (The CrossFire Bridge is provided with the graphics card you purchase, not bundled with this motherboard. Please refer to your graphics card vendor for details.)

#### Step 3

Connect a VGA cable or a DVI cable to the monitor connector or the DVI connector of the graphics card that is inserted to PCIE1 slot.

### 2.7.2 Driver Installation and Setup

#### Step 1

Power on your computer and boot into OS.

#### Step 2

Remove the AMD drivers if you have any VGA drivers installed in your system.

The Catalyst Uninstaller is an optional download. We recommend using this utility to uninstall any previously installed Catalyst drivers prior to installation. Please check AMD's website for AMD driver updates.

#### Step 3

Install the required drivers and CATALYST Control Center then restart your computer. Please check AMD's website for details.

#### AMD Catalyst Control Center

#### Step 4

Double-click the **AMD Catalyst Control Center** icon in the Windows system tray.

#### Step 5

In the left pane, click **Performance** and then **AMD CrossFireX**<sup>TM</sup>. Then select **Enable AMD CrossFireX** and click **Apply**. Select the GPU number according to your graphics card and click **Apply**.

#### 2.8 M.2 WiFi/BT Module Installation Guide

The M.2, also known as the Next Generation Form Factor (NGFF), is a small size and versatile card edge connector that aims to replace mPCIe and mSATA. The M.2 Socket (Key E) supports type 2230 WiFi/BT module.

#### Installing the WiFi/BT module

#### Step 1

Prepare a type 2230 WiFi/BT module and the screw.

#### Step 2

Find the nut location to be used.

#### Step 3

Gently insert the WiFi/BT module into the M.2 slot. Please be aware that the module only fits in one orientation.

#### Step 4

Tighten the screw with a screwdriver to secure the module into place. Please do not overtighten the screw as this might damage the module.

### 2.9 M.2\_SSD (NGFF) Module Installation Guide (M2\_1)

The M.2, also known as the Next Generation Form Factor (NGFF), is a small size and versatile card edge connector that aims to replace mPCIe and mSATA. The Ultra M.2 Socket (M2\_1) supports M Key type 2242/2260/2280 M.2 PCI Express module up to Gen3 x4 (32 Gb/s).

#### Installing the M.2\_SSD (NGFF) Module

#### Step 1

Prepare a M.2\_SSD (NGFF) module and the screw.

#### Step 2

Depending on the PCB type and length of your M.2\_SSD (NGFF) module, find the corresponding nut location to be used.

No.		2	
Nut Location	A	В	С
PCB Length	4.2cm	6cm	8cm
Module Type	Type 2242	Type2260	Type 2280

#### Step 3

Before installing a M.2 (NGFF) SSD module, please loosen the screws to remove the M.2 heatsink.

#### Step 4

Prepare the M.2 standoff that comes with the package. Then hand tighten the standoff into the desired nut location on the motherboard. Align and gently insert the M.2 (NGFF) SSD module into the M.2 slot. Please be aware that the M.2 (NGFF) SSD module only fits in one orientation.

#### Step 5

Tighten the screw with a screwdriver to secure the module into place. Please do not overtighten the screw as this might damage the module.

# 2.10 M.2 SSD (NGFF) Module Installation Guide (M2 2)

The M.2, also known as the Next Generation Form Factor (NGFF), is a small size and versatile card edge connector that aims to replace mPCIe and mSATA. The Ultra M.2 Socket (M2\_2) supports M Key type 2242/2260/2280/22110 M.2 SATA3 6.0 Gb/s module and M.2 PCI Express module up to Gen3 x4 (32 Gb/s).

\* If M2\_2 is occupied by a SATA-type M.2 device, SATA3\_0 will be disabled.

# Installing the M.2\_SSD (NGFF) Module

#### Step 1

Prepare a M.2\_SSD (NGFF) module and the screw.

#### Step 2

Depending on the PCB type and length of your M.2\_SSD (NGFF) module, find the corresponding nut location to be used.

No.	1	2	3	4
Nut Location	A	В	С	D
PCB Length	4.2cm	6cm	8cm	11cm
Module Type	Type 2242	Type2260	Type 2280	Type 22110

#### Step 3

Move the standoff based on the module type and length.

The standoff is placed at the nut location D by default. Skip Step 3 and 4 and go straight to Step 5 if you are going to use the default nut.

Otherwise, release the standoff by hand.

#### Step 4

Peel off the yellow protective film on the nut to be used. Hand tighten the standoff into the desired nut location on the motherboard.

### Step 5

Gently insert the M.2 (NGFF) SSD module into the M.2 slot. Please be aware that the M.2 (NGFF) SSD module only fits in one orientation.

#### Step 6

Tighten the screw with a screwdriver to secure the module into place. Please do not overtighten the screw as this might damage the module.

For the latest updates of M.2\_SSD (NFGG) module support list, please visit our website for details:  $\frac{http://www.asrock.com}{http://www.asrock.com}$ 

# **Chapter 3 Software and Utilities Operation**

# 3.1 Installing Drivers

The Support CD that comes with the motherboard contains necessary drivers and useful utilities that enhance the motherboard's features.

### Running The Support CD

To begin using the support CD, insert the CD into your CD-ROM drive. The CD automatically displays the Main Menu if "AUTORUN" is enabled in your computer. If the Main Menu does not appear automatically, locate and double click on the file "ASRSETUP.EXE" in the Support CD to display the menu.

#### Drivers Menu

The drivers compatible to your system will be auto-detected and listed on the support CD driver page. Please click **Install All** or follow the order from top to bottom to install those required drivers. Therefore, the drivers you install can work properly.

#### **Utilities Menu**

The Utilities Menu shows the application software that the motherboard supports. Click on a specific item then follow the installation wizard to install it.

# 3.2 A-Tuning

A-Tuning is ASRock's multi purpose software suite with a new interface, more new features and improved utilities.

# 3.2.1 Installing A-Tuning

A-Tuning can be downloaded from ASRock Live Update & APP Shop. After the installation, you will find the icon "A-Tuning" on your desktop. Double-click the "A-Tuning"  $\begin{tabular}{ll}$  icon, A-Tuning main menu will pop up.

# 3.2.2 Using A-Tuning

There are four sections in A-Tuning main menu: Operation Mode, System Info, FAN-Tastic Tuning and Settings.

### **Operation Mode**

Choose an operation mode for your computer.

# System Info

View information about the system.

\*The System Browser tab may not appear for certain models.

# **FAN-Tastic Tuning**

Configure up to five different fan speeds using the graph. The fans will automatically shift to the next speed level when the assigned temperature is met.

# Settings

Configure ASRock A-Tuning. Click to select "Auto run at Windows Startup" if you want A-Tuning to be launched when you start up the Windows operating system.

# 3.3 ASRock Live Update & APP Shop

The ASRock Live Update & APP Shop is an online store for purchasing and downloading software applications for your ASRock computer. You can quickly and easily install various apps and support utilities. With ASRock Live Update & APP Shop, you can optimize your system and keep your motherboard up to date simply with a few clicks.

Double-click on your desktop to access ASRock Live Update & APP Shop utility.

\*You need to be connected to the Internet to download apps from the ASRock Live Update & APP Shop.

#### 3.3.1 UI Overview

Information Panel

**Category Panel**: The category panel contains several category tabs or buttons that when selected the information panel below displays the relative information.

**Information Panel**: The information panel in the center displays data about the currently selected category and allows users to perform job-related tasks.

**Hot News**: The hot news section displays the various latest news. Click on the image to visit the website of the selected news and know more.

# 3.3.2 Apps

When the "Apps" tab is selected, you will see all the available apps on screen for you to download.

# Installing an App

#### Step 1

Find the app you want to install.

The most recommended app appears on the left side of the screen. The other various apps are shown on the right. Please scroll up and down to see more apps listed.

You can check the price of the app and whether you have already intalled it or not.

- Fee The red icon displays the price or "Free" if the app is free of charge.
- The green "Installed" icon means the app is installed on your computer.

### Step 2

Click on the app icon to see more details about the selected app.

### Step 3

If you want to install the app, click on the red icon to start downloading.

### Step 4

When installation completes, you can find the green "Installed" icon appears on the upper right corner.

To uninstall it, simply click on the trash can icon  $\overline{\mathbb{U}}$ .

<sup>\*</sup>The trash icon may not appear for certain apps.

# Upgrading an App

You can only upgrade the apps you have already installed. When there is an available new version for your app, you will find the mark of "New Version" appears below the installed app icon.

### Step 1

Click on the app icon to see more details.

#### Step 2

Click on the yellow icon version to start upgrading.

# 3.3.3 BIOS & Drivers

# Installing BIOS or Drivers

When the "BIOS & Drivers" tab is selected, you will see a list of recommended or critical updates for the BIOS or drivers. Please update them all soon.

#### Step 1

Please check the item information before update. Click on 💝 to see more details.

#### Step 2

Click to select one or more items you want to update.

# Step 3

Click Update to start the update process.

# 3.3.4 Setting

In the "Setting" page, you can change the language, select the server location, and determine if you want to automatically run the ASRock Live Update & APP Shop on Windows startup.

# 3.4 ASRock Polychrome RGB

ASRock Polychrome RGB is a lighting control utility specifically designed for unique individuals with sophisticated tastes to build their own stylish colorful lighting system. Simply by connecting the LED strip, you can customize various lighting schemes and patterns, including Static, Breathing, Strobe, Cycling, Music, Wave and more.

# Connecting the LED Strip

Connect your RGB LED strips to the **RGB LED Headers** (**RGB\_LED1**, **RGB\_LED2**) on the motherboard.

- Never install the RGB LED cable in the wrong orientation; otherwise, the cable may be damaged.
- Before installing or removing your RGB LED cable, please power off your system and unplug the power cord from the power supply. Failure to do so may cause damages to motherboard components.

- 1. Please note that the RGB LED strips do not come with the package.
- The RGB LED header supports standard 5050 RGB LED strip (12V/G/R/B), with a maximum power rating of 3A (12V) and length within 2 meters.

# Connecting the Addressable RGB LED Strip

Connect your Addressable RGB LED strip to the **Addressable LED Header (A\_DDR\_LED1)** on the motherboard.

- Never install the RGB LED cable in the wrong orientation; otherwise, the cable may be damaged.
- Before installing or removing your RGB LED cable, please power off your system and unplug the power cord from the power supply. Failure to do so may cause damages to motherboard components.

- 1. Please note that the RGB LED strips do not come with the package.
- 2. The RGB LED header supports WS2812B addressable RGB LED strip (5V/Data/GND), with a maximum power rating of 3A (5V) and length within 2 meters.

# ASRock Polychrome RGB Utility

Now you can adjust the RGB LED color through the ASRock Polychrome RGB utility. Download this utility from the ASRock Live Update & APP Shop and start coloring your PC style your way!

# **Chapter 4 UEFI SETUP UTILITY**

# 4.1 Introduction

This section explains how to use the UEFI SETUP UTILITY to configure your system. You may run the UEFI SETUP UTILITY by pressing <F2> or <Del> right after you power on the computer, otherwise, the Power-On-Self-Test (POST) will continue with its test routines. If you wish to enter the UEFI SETUP UTILITY after POST, restart the system by pressing <Ctl> + <Alt> + <Delete>, or by pressing the reset button on the system chassis. You may also restart by turning the system off and then back on.

Because the UEFI software is constantly being updated, the following UEFI setup screens and descriptions are for reference purpose only, and they may not exactly match what you see on your screen.

### 4.2 EZ Mode

The EZ Mode screen appears when you enter the BIOS setup program by default. EZ mode is a dashboard which contains multiple readings of the system's current status. You can check the most crucial information of your system, such as CPU speed, DRAM frequency, SATA information, fan speed, etc.

Press <F6> or click the "Advanced Mode" button at the upper right corner of the screen to switch to "Advanced Mode" for more options.

No.	Function
1	Help
2	Load UEFI Defaults
3	Save Changes and Exit
4	Discard Changes
5	Change Language
6	Switch to Advanced Mode

# 4.3 Advanced Mode

The Advanced Mode provides more options to configure the BIOS settings. Refer to the following sections for the detailed configurations.

To access the EZ Mode, press <F6> or click the "EZ Mode" button at the upper right corner of the screen.

# 4.3.1 UEFI Menu Bar

The top of the screen has a menu bar with the following selections:

OC Tweaker For overclocking configurations
Advanced For advanced system configurations
Tool Useful tools
H/W Monitor Displays current hardware status
<b>Security</b> For security settings
<b>Boot</b> For configuring boot settings and boot priority
<b>Exit</b> Exit the current screen or the UEFI Setup Utility

# 4.3.2 Navigation Keys

Use <  $\rightarrow$  key or <  $\rightarrow$  key to choose among the selections on the menu bar, and use <  $\uparrow$  > key or <  $\downarrow$  > key to move the cursor up or down to select items, then press <Enter> to get into the sub screen. You can also use the mouse to click your required item.

Please check the following table for the descriptions of each navigation key.

Navigation Key(s)	Description
+ / -	To change option for the selected items
<tab></tab>	Switch to next function
<pgup></pgup>	Go to the previous page
<pgdn></pgdn>	Go to the next page
<home></home>	Go to the top of the screen
<end></end>	Go to the bottom of the screen
<f1></f1>	To display the General Help Screen
<f5></f5>	Add / Remove Favorite
<f7></f7>	Discard changes and exit the SETUP UTILITY
<f9></f9>	Load optimal default values for all the settings
<f10></f10>	Save changes and exit the SETUP UTILITY
<f12></f12>	Print screen
<esc></esc>	Jump to the Exit Screen or exit the current screen

# 4.4 Main Screen

When you enter the UEFI SETUP UTILITY, the Main screen will appear and display the system overview.

# My Favorite

Display your collection of BIOS items. Press F5 to add/remove your favorite items.

### 4.5 OC Tweaker Screen

In the OC Tweaker screen, you can set up overclocking features.

Because the UEFI software is constantly being updated, the following UEFI setup screens and descriptions are for reference purpose only, and they may not exactly match what you see on your screen.

# **CPU Configuration**

#### **Boot Performance Mode**

Select the performance state that the BIOS will set before OS handoff.

### FCLK Frequency

Configure the FCLK Frequency.

#### **AVX Ratio Offset**

AVX Ratio Offset specifies a negative offset from the CPU Ratio for AVX workloads. AVX is a more stressful workload that lower the AVX ratio to ensure maximum possible ratio for SSE workloads.

# BCLK Aware Adaptive Voltage

BCLK Aware Adaptive Voltage enable/disable. When enabled, pcode will be aware

of the BCLK frequency when calculating the CPU V/F curves. This is ideal for BCLK OC to avoid high voltage overrides.

### Ring to Core Ratio Offset

Disable Ring to Core Ratio Offset so the ring and core can run at the same frequency.

### Intel SpeedStep Technology

Intel SpeedStep technology allows processors to switch between multiple frequencies and voltage points for better power saving and heat dissipation.

### Intel Turbo Boost Technology

Intel Turbo Boost Technology enables the processor to run above its base operating frequency when the operating system requests the highest performance state.

## Intel Speed Shift Technology

Enable/Disable Intel Speed Shift Technology support. Enabling will expose the CPPC v2 interface to allow for hardware controlled P-states.

### Long Duration Power Limit

Configure Package Power Limit 1 in watts. When the limit is exceeded, the CPU ratio will be lowered after a period of time. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

# Long Duration Maintained

Configure the period of time until the CPU ratio is lowered when the Long Duration Power Limit is exceeded.

#### Short Duration Power Limit

Configure Package Power Limit 2 in watts. When the limit is exceeded, the CPU ratio will be lowered immediately. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

#### **CPU Core Current Limit**

Configure the current limit of the CPU core. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

#### GT Current Limit

Configure the current limit of the GT slice. A lower limit can protect the CPU and save power, while a higher limit may improve performance.

# **GT** Frequency

Configure the frequency of the integrated GPU.

### **DRAM Configuration**

#### DRAM Tweaker

Fine tune the DRAM settings by leaving marks in checkboxes. Click OK to confirm and apply your new settings.

### **DRAM Timing Configuration**

#### Load XMP Setting

Load XMP settings to overclock the memory and perform beyond standard specifications.

#### DRAM Reference Clock

Select Auto for optimized settings.

### **DRAM Frequency**

If [Auto] is selected, the motherboard will detect the memory module(s) inserted and assign the appropriate frequency automatically.

#### **DRAM Clock**

Choose a frequency to override to clock delay for memory training. DRAM Clock controls memory training only if ASRock Timing Optimization is disabled.

#### **Primary Timing**

### CAS# Latency (tCL)

The time between sending a column address to the memory and the beginning of the data in response.

#### RAS# to CAS# Delay and Row Precharge (tRCDtRP)

RAS# to CAS# Delay: The number of clock cycles required between the opening of a row of memory and accessing columns within it.

Row Precharge: The number of clock cycles required between the issuing of the precharge command and opening the next row.

### RAS# Active Time (tRAS)

The number of clock cycles required between a bank active command and issuing the precharge command.

### Command Rate (CR)

The delay between when a memory chip is selected and when the first active command can be issued.

# Secondary Timing

### Write Recovery Time (tWR)

The amount of delay that must elapse after the completion of a valid write operation, before an active bank can be precharged.

#### Refresh Cycle Time (tRFC)

The number of clocks from a Refresh command until the first Activate command to the same rank

#### RAS to RAS Delay (tRRD L)

The number of clocks between two rows activated in different banks of the same rank

### RAS to RAS Delay (tRRD S)

The number of clocks between two rows activated in different banks of the same rank.

#### Write to Read Delay (tWTR L)

The number of clocks between the last valid write operation and the next read command to the same internal bank.

#### Write to Read Delay (tWTR S)

The number of clocks between the last valid write operation and the next read command to the same internal bank.

#### Read to Precharge (tRTP)

The number of clocks that are inserted between a read command to a row precharge command to the same rank.

#### Four Activate Window (tFAW)

The time window in which four activates are allowed the same rank.

#### CAS Write Latency (tCWL)

Configure CAS Write Latency.

### Third Timing

#### tREFI

Configure refresh cycles at an average periodic interval.

#### tCKE

Configure the period of time the DDR4 initiates a minimum of one refresh command internally once it enters Self-Refresh mode.

#### **Turn Around Timing**

# tRDRD\_sg

Configure between module read to read delay.

### tRDRD\_dg

Configure between module read to read delay.

#### tRDRD dr

Configure between module read to read delay.

### tRDRD dd

Configure between module read to read delay.

# tRDWR\_sg

Configure between module read to write delay.

#### tRDWR dq

Configure between module read to write delay.

#### tRDWR dr

Configure between module read to write delay.

#### tRDWR dd

Configure between module read to write delay.

#### tWRRD sq

Configure between module write to read delay.

#### tWRRD dq

Configure between module write to read delay.

### tWRRD dr

Configure between module write to read delay.

### tWRRD dd

Configure between module write to read delay.

### tWRWR\_sg

Configure between module write to write delay.

# tWRWR\_dg

Configure between module write to write delay.

#### tWRWR dr

Configure between module write to write delay.

#### tWRWR dd

Configure between module write to write delay.

# **Round Trip Timing**

#### RTL Init Value

Configure round trip latency init value for round trip latency training.

#### IO-L Init Value

Configure IO latency init value for IO latency training.

#### RTL (CH A)

Configure round trip latency for channel A.

#### RTL (CH B)

Configure round trip latency for channel B.

#### IO-L (CH A)

Configure IO latency for channel A.

### IO-L (CH B)

Configure IO latency for channel B.

#### IO-L Offset (CH A)

Configure IO latency offset for channel A.

#### IO-L Offset (CH B)

Configure IO latency offset for channel B.

### RFR Delay (CH A)

Configure RFR Delay for Channel A.

### RFR Delay (CH B)

Configure RFR Delay for Channel B.

### ODT Setting

#### ODT WR (A1)

Configure the memory on die termination resistors' WR for channel A1.

#### ODT WR (A2)

Configure the memory on die termination resistors' WR for channel A2.

#### ODT WR (B1)

Configure the memory on die termination resistors' WR for channel B1.

### ODT WR (B2)

Configure the memory on die termination resistors' WR for channel B2.

#### ODT NOM (A1)

Use this to change ODT (CH A1) Auto/Manual settings. The default is [Auto].

#### ODT NOM (A2)

Use this to change ODT (CH A2) Auto/Manual settings. The default is [Auto].

#### ODT NOM (B1)

Use this to change ODT (CH B1) Auto/Manual settings. The default is [Auto].

#### ODT NOM (B2)

Use this to change ODT (CH B2) Auto/Manual settings. The default is [Auto].

#### ODT PARK (A1)

Configure the memory on die termination resistors' PARK for channel A1.

#### ODT PARK (A2)

Configure the memory on die termination resistors' PARK for channel A2.

#### ODT PARK (B1)

Configure the memory on die termination resistors' PARK for channel B1.

### ODT PARK (B2)

Configure the memory on die termination resistors' PARK for channel B2.

## **COMP Setting**

RCOMP0: DQ ODT (Read)

Default is 121

RCOMP1: DQ /CLK Ron (Drive Strength)

Default is 75.

RCOMP2: CMD/CTL Ron (Drive Strength)

Default is 100.

### DQ ODT Driving

Adjust ODT Driving for better signal. Default is 60.

#### DQ Driving

Adjust DQ Driving for better signal. Default is 26.

# **Command Driving**

Adjust Command Driving for better signal. Default is 20.

### Control Driving

Adjust Control Driving for better signal. Default is 20.

#### Clock Driving

Adjust Clock Driving for better signal. Default is 26.

#### DO Slew Rate

Adjust DQ Slew Rate for better signal. Default is 59.

#### Command Slew Rate

Adjust Command Slew Rate for better signal. Default is 53 for IN, 89 for 2N.

#### Contorl Slew Rate

Adjust Control Slew Rate for better signal. Default is 53.

#### Clock Slew Rate

Adjust Clock Slew Rate for better signal. Default is 53.

### MRS Setting

#### MRS tCI

Configure the tCL for Memory MRS MR0.

#### MRS tWRtRTP

Configure the tWRtRTP for Memory MRS MRC.

#### MRS tCWI

Configure the tCWL for Memory MRS MR2.

### MRS tCCD L

Configure the tCL for Memory MRS MR6.

# **Advanced Setting**

### ASRock Timing Optimization

Configure the fast path through the MRC.

### Realtime Memory Timing

Configure the realtime memory timings.

[Enabled] The system will allow performing realtime memory timing changes after MRC\_DONE.

#### Command Tristate

Configure the Command Tristate Support.

#### Exit On Failure

Configure the Exit On Failure for MRC training steps.

### Reset On Training Fail

Reset system if the MRC training fails.

#### MRC Fast Boot

Enable Memory Fast Boot to skip DRAM memory training for booting faster.

### **Voltage Configuration**

#### CPU Core/Cache Voltage

Configure the voltage for the CPU Core/Cache.

#### CPU Load-Line Calibration

CPU Load-Line Calibration helps prevent CPU voltage droop when the system is under heavy loading.

### GT Voltage

Configure the voltage for the integrated GPU.

#### GT Load-Line Calibration

GT Load-Line Calibration helps prevent integrated GPU voltage droop when the system is under heavy load.

### **DRAM Voltage**

Use this to configure DRAM Voltage. The default value is [Auto].

### **DRAM Activating Power Supply**

Configure the voltage for the DRAM Activating Power Supply.

### PCH +1.0 Voltage

Configure the chipset voltage (1.0V).

## VCCST Voltage

Configure the voltage for the VCCST.

# VCCSA Voltage

Configure the voltage for the VCCSA.

#### Save User Default

Type a profile name and press enter to save your settings as user default.

#### Load User Default

Load previously saved user defaults.

# Save User UEFI Setup Profile to Disk

It helps you to save current UEFI settings as an user profile to disk.

## Load User UEFI Setup Profile from Disk

You can load previous saved profile from the disk.

### 4.6 Advanced Screen

In this section, you may set the configurations for the following items: CPU Configuration, Chipset Configuration, Storage Configuration, Super IO Configuration, ACPI Configuration, USB Configuration and Trusted Computing.

Setting wrong values in this section may cause the system to malfunction.

# **UEFI** Configuration

# **UEFI Setup Style**

Select the default mode when entering the UEFI setup utility.

# Active Page on Entry

Select the default page when entering the UEFI setup utility.

#### Full HD UFFI

When [Auto] is selected, the resolution will be set to 1920 x 1080 if the monitor supports Full HD resolution. If the monitor does not support Full HD resolution, then the resolution will be set to  $1024 \times 768$ . When [Disable] is selected, the resolution will be set to  $1024 \times 768$  directly.

# 4.6.1 CPU Configuration

### Intel Hyper Threading Technology

Intel Hyper Threading Technology allows multiple threads to run on each core, so that the overall performance on threaded software is improved.

#### **Active Processor Cores**

Select the number of cores to enable in each processor package.

### **CPU C States Support**

Enable CPU C States Support for power saving. It is recommended to keep C3, C6 and C7 all enabled for better power saving.

## Enhanced Halt State (C1E)

Enable Enhanced Halt State (C1E) for lower power consumption.

### **CPU C3 State Support**

Enable C3 sleep state for lower power consumption.

# **CPU C6 State Support**

Enable C6 deep sleep state for lower power consumption.

### **CPU C7 State Support**

Enable C7 deep sleep state for lower power consumption.

## Package C State Support

Enable CPU, PCIe, Memory, Graphics C State Support for power saving.

#### CFG Lock

This item allows you to disable or enable the CFG Lock.

## **CPU Thermal Throttling**

Enable CPU internal thermal control mechanisms to keep the CPU from overheating.

## Intel Virtualization Technology

Intel Virtualization Technology allows a platform to run multiple operating systems and applications in independent partitions, so that one computer system can function as multiple virtual systems.

#### Hardware Prefetcher

Automatically prefetch data and code for the processor. Enable for better performance.

### Adjacent Cache Line Prefetch

Automatically prefetch the subsequent cache line while retrieving the currently requested cache line. Enable for better performance.

### Software Guard Extensions (SGX)

Intel SGX is a set of new CPU instructions that can be used by applications to set aside private regions of code and data.

# 4.6.2 Chipset Configuration

# **Primary Graphics Adapter**

Select a primary VGA.

# Above 4G Decoding

Enable or disable 64bit capable Devices to be decoded in Above 4G Address Space (only if the system supports 64 bit PCI decoding).

#### VT-d

Intel® Virtualization Technology for Directed I/O helps your virtual machine monitor better utilize hardware by improving application compatibility and reliability, and providing additional levels of manageability, security, isolation, and I/O performance.

# PCIE1 Link Speed

Select the link speed for PCIE1.

# PCIE2 Link Speed

Select the link speed for PCIE2.

# PCIE3 Link Speed

Select the link speed for PCIE3.

# **PCI Express Native Control**

Select Enable for enhanced PCI Express power saving in OS.

### PCIE ASPM Support

This option enables/disables the ASPM support for all CPU downstream devices.

#### PCH PCIE ASPM Support

This option enables/disables the ASPM support for all PCH PCIE devices.

# **DMI ASPM Support**

This option enables/disables the control of ASPM on CPU side of the DMI Link.

# **PCH DMI ASPM Support**

This option enables/disables the ASPM support for all PCH DMI devices.

### **Share Memory**

Configure the size of memory that is allocated to the integrated graphics processor when the system boots up.

#### IGPU Multi-Monitor

Select disable to disable the integrated graphics when an external graphics card is installed. Select enable to keep the integrated graphics enabled at all times.

#### Inte(R) Ethernet Connection I219-V

Enable or disable the onboard network interface controller (Intel® I219V).

#### Onboard HD Audio

Enable/disable onboard HD audio. Set to Auto to enable onboard HD audio and automatically disable it when a sound card is installed.

#### Front Panel

Enable/disable front panel HD audio.

#### Onboard HDMI HD Audio

Enable audio for the onboard digital outputs.

#### Onboard WAN Device

Enable/disable the onboard WAN device.

#### **WAN Radio**

Enable/disable the WiFi module's connectivity.

#### Bluetooth

Enable/disable the bluetooth.

# Deep Sleep

Configure deep sleep mode for power saving when the computer is shut down.

# Restore on AC/Power Loss

Select the power state after a power failure. If [Power Off] is selected, the power will remain off when the power recovers. If [Power On] is selected, the system will start to boot up when the power recovers.

#### Turn On Onboard LED in S5

Turn on/off the LED in the ACPI S5 state.

#### Restore Onboard LED Default

Restore the onboard LED default value.

# 4.6.3 Storage Configuration

# SATA Controller(s)

Enable/disable the SATA controllers.

# SATA Controller Speed

Indicates the maximum speed the SATA controller can support.

#### SATA Mode Selection

[AHCI] Supports new features that improve performance.

[Intel RST Premium (RAID)] Combine multiple disk drives into a logical unit.

# SATA Aggressive Link Power Management

SATA Aggressive Link Power Management allows SATA devices to enter a low power state during periods of inactivity to save power. It is only supported by AHCI mode.

#### Hard Disk S.M.A.R.T.

S.M.A.R.T stands for Self-Monitoring, Analysis, and Reporting Technology. It is a monitoring system for computer hard disk drives to detect and report on various indicators of reliability.

# 4.6.4 Super IO Configuration

# Serial Port

Enable or disable the Serial port.

#### Serial Port Address

Select the address of the Serial port.

# PS2 Y-Cable

Enable the PS2 Y-Cable or set this option to Auto.

# 4.6.5 ACPI Configuration

# Suspend to RAM

Select disable for ACPI suspend type S1. It is recommended to select auto for ACPI S3 power saving.

#### **ACPI HEPT Table**

Enable the High Precision Event Timer for better performance.

### PS/2 Keyboard Power On

Allow the system to be waked up by a PS/2 Keyboard.

# PCIE Devices Power On

Allow the system to be waked up by a PCIE device and enable wake on LAN.

### 1219 LAN Power On

Allow the system to be waked up by the Onboard Intel LAN.

### Ring-In Power On

Allow the system to be waked up by onboard COM port modem Ring-In signals.

#### RTC Alarm Power On

Allow the system to be waked up by the real time clock alarm. Set it to By OS to let it be handled by your operating system.

# USB Keyboard/Remote Power On

Allow the system to be waked up by an USB keyboard or remote controller.

# USB Mouse Power On

Allow the system to be waked up by an USB mouse.

# 4.6.6 USB Configuration

# Legacy USB Support

Enable or disable Legacy OS Support for USB 2.0 devices. If you encounter USB compatibility issues it is recommended to disable legacy USB support. Select UEFI Setup Only to support USB devices under the UEFI setup and Windows/Linux operating systems only.

#### PS/2 Simulator

Enable PS/2 Simulator. This should be enabled for the complete USB keyboard legacy support for non-USB aware OSes.

#### XHCI Hand-off

This is a workaround for OSes without XHCI hand-off support. The XHCI ownership change should be claimed by XHCI driver.

# 4.6.7 Trusted Computing

# **Security Device Support**

Enable or disable BIOS support for security device.

### 4.7 Tools

# ASRock Polychrome RGB

ASRock Polychrome RGB allows you to adjust the RGB LED color to your liking.

#### **UFFI Tech Service**

Contact ASRock Tech Service if you are having trouble with your PC. Please setup network configuration before using UEFI Tech Service.

#### SSD Secure Erase Tool

Use this tool to securely erase SSD.

#### Instant Flash

Save UEFI files in your USB storage device and run Instant Flash to update your UEFI.

### Internet Flash - DHCP (Auto IP), Auto

ASRock Internet Flash downloads and updates the latest UEFI firmware version from our servers for you. Please setup network configuration before using Internet Flash.

\*For BIOS backup and recovery purpose, it is recommended to plug in your USB pen drive before using this function.

# **Network Configuration**

Use this to configure internet connection settings for Internet Flash.

# Internet Setting

Enable or disable sound effects in the setup utility.

# **UEFI** Download Server

Select a server to download the UEFI firmware.

# 4.8 Hardware Health Event Monitoring Screen

This section allows you to monitor the status of the hardware on your system, including the parameters of the CPU temperature, motherboard temperature, fan speed and voltage.

# Fan Tuning

Measure Fan Min Duty Cycle.

# Fan-Tastic Tuning

Select a fan mode for CPU Fan, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

### CPU Fan 1 Setting

Select a fan mode for CPU Fan 1, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

# CPU Fan 1 Step Up

Set the value of CPU Fan 1 Step Up.

# CPU Fan 1 Step Down

Set the value of CPU Fan 1 Step Down.

# CPU\_FAN2 / W\_Pump Switch

Select CPU Water Pump mode.

#### CPU Fan 2 Control Mode

Select PWM mode or DC mode for CPU fan 2.

### CPU Fan 2 Setting

Select a fan mode for CPU Fan 2, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

#### CPU Fan 2 Temp Source

Select a fan temperature source for CPU Fan 2.

### CPU Fan 2 Step Up

Set the value of CPU Fan 2 Step Up.

#### CPU Fan 2 Step Down

Set the value of CPU Fan 2 Step Down.

#### CHA\_FAN1 / W\_Pump Switch

Select Chassis Fan 1 or Water Pump mode.

#### Chassis Fan 1 Control Mode

Select PWM mode or DC mode for Chassis Fan 1.

#### Chassis Fan 1 Setting

Select a fan mode for Chassis Fan 1, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

# Chassis Fan 1 Temp Source

Select a fan temperature source for Chassis Fan 1.

# Chassis Fan 1 Step Up

Set the value of Chassis Fan 1 Step Up.

#### Chassis Fan 1 Step Down

Set the value of Chassis Fan 1 Step Down.

#### CHA FAN2/W Pump Switch

Select Chassis Fan 2 or Water Pump mode.

#### Chassis Fan 2 Control Mode

Select PWM mode or DC mode for Chassis Fan 2.

# Chassis Fan 2 Setting

Select a fan mode for Chassis Fan 2, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

# Chassis Fan 2 Temp Source

Select a fan temperature source for Chassis Fan 2.

### Chassis Fan 2 Step Up

Set the value of Chassis Fan 2 Step Up.

### Chassis Fan 2 Step Down

Set the value of Chassis Fan 2 Step Down.

# CHA\_FAN3 / W\_Pump Switch

Select Chassis Fan 3 or Water Pump mode.

#### Chassis Fan 3 Control Mode

Select PWM mode or DC mode for Chassis Fan 3.

### Chassis Fan 3 Setting

Select a fan mode for Chassis Fan 3, or choose Customize to set 5 CPU temperatures and assign a respective fan speed for each temperature.

### Chassis Fan 3 Temp Source

Select a fan temperature source for Chassis Fan 3.

# Chassis Fan 3 Step Up

Set the value of Chassis Fan 3 Step Up.

### Chassis Fan 3 Step Down

Set the value of Chassis Fan 3 Step Down.

# Case Open Feature

Enable or disable Case Open Feature to detect whether the chassis cover has been removed.

# 4.9 Security Screen

In this section you may set or change the supervisor/user password for the system. You may also clear the user password.

# Supervisor Password

Set or change the password for the administrator account. Only the administrator has authority to change the settings in the UEFI Setup Utility. Leave it blank and press enter to remove the password.

#### User Password

Set or change the password for the user account. Users are unable to change the settings in the UEFI Setup Utility. Leave it blank and press enter to remove the password.

#### Secure Boot

Use this item to enable or disable support for Secure Boot.

# Intel(R) Platform Trust Technology

Enable/disable Intel PTT in ME. Disable this option to use discrete TPM Module.

### 4.10 Boot Screen

This section displays the available devices on your system for you to configure the boot settings and the boot priority.

#### Fast Boot

Fast Boot minimizes your computer's boot time. In fast mode you may not boot from an USB storage device. The VBIOS must support UEFI GOP if you are using an external graphics card. Please notice that Ultra Fast mode will boot so fast that the only way to enter this UEFI Setup Utility is to Clear CMOS or run the Restart to UEFI utility in Windows.

#### **Boot From Onboard LAN**

Allow the system to be waked up by the onboard LAN.

#### Setup Prompt Timeout

Configure the number of seconds to wait for the setup hot key.

#### **Bootup Num-Lock**

Select whether Num Lock should be turned on or off when the system boots up.

#### **Boot Beep**

Select whether the Boot Beep should be turned on or off when the system boots up. Please note that a buzzer is needed.

# Full Screen Logo

Enable to display the boot logo or disable to show normal POST messages.

### AddOn ROM Display

Enable AddOn ROM Display to see the AddOn ROM messages or configure the AddOn ROM if you've enabled Full Screen Logo. Disable for faster boot speed.

### **Boot Failure Guard Message**

If the computer fails to boot for a number of times the system automatically restores the default settings.

# **CSM (Compatibility Support Module)**

#### **CSM**

Enable to launch the Compatibility Support Module. Please do not disable unless you're running a WHCK test.

# Launch PXE OpROM Policy

Select UEFI only to run those that support UEFI option ROM only. Select Legacy only to run those that support legacy option ROM only. Select Do not launch to not execute both legacy and UEFI option ROM.

# Launch Storage OpROM Policy

Select UEFI only to run those that support UEFI option ROM only. Select Legacy only to run those that support legacy option ROM only. Select Do not launch to not execute both legacy and UEFI option ROM.

# Other PCI Device ROM Priority

For PCI devices other than Network. Mass storage or Video defines which OpROM to launch.

# 4.11 Exit Screen

# Save Changes and Exit

When you select this option the following message, "Save configuration changes and exit setup?" will pop out. Select [OK] to save changes and exit the UEFI SETUP UTILITY.

# Discard Changes and Exit

When you select this option the following message, "Discard changes and exit setup?" will pop out. Select [OK] to exit the UEFI SETUP UTILITY without saving any changes.

# **Discard Changes**

When you select this option the following message, "Discard changes?" will pop out. Select [OK] to discard all changes.

#### Load UEFI Defaults

Load UEFI default values for all options. The F9 key can be used for this operation.

# Launch EFI Shell from filesystem device

Copy shellx64.efi to the root directory to launch EFI Shell.

# **Contact Information**

If you need to contact ASRock or want to know more about ASRock, you're welcome to visit ASRock's website at http://www.asrock.com; or you may contact your dealer for further information. For technical questions, please submit a support request form at https://event.asrock.com/tsd.asp
