A diagram illustrating a basic stereo setup. On the left, there are two identical speakers, each with a circular driver. On the right, there is a computer monitor on a stand. From the bottom of each speaker, an orange arrow points diagonally downwards and outwards. From the bottom center of the monitor stand, an orange arrow points diagonally downwards and inwards. The two arrows converge towards a common point centered between the space between the speakers and the base of the monitor.

The diagram illustrates the power connection process in two steps. Step 1 shows the power cord being plugged into the back of the unit. Step 2 shows the power cord being plugged into a wall outlet.
